MEMO

Salt Lake City, UT

TO: Jeff Reddoor

DATE: January 28, 2008

FROM: James Dahl

SUBJECT: DFCM Job# 07165730 – Bidders
Questions

1. Do we want need to replace the entire door front to the facilities building?

No, for the bid only include changing the hinges of the door using the existing door frame.

2. On page 3 of the plans (new storm drain) it says that we are to protect in place the existing storm drain head wall, this cannot be done when installing new man hole, also is that manhole or a drop inlet box where we tie in to the existing storm drain and then do we replace the headwall?

The new man hole is to be installed behind the head wall. It will be a drop manhole. If you can not protect the head wall, then replace the head wall so it will retain the soil around the new manhole.

3. Where we tie into the curb @ street with new storm drain can we put a under sidewalk (trench drain) with a metal cover?

No trench drain with metal cover will be allowed.
