# PROJECT DESCRIPTION

## BACKGROUND INFORMATION

The State of Utah has purchased a block of property for development into the new Ogden Juvenile Courthouse (OJC) in downtown Ogden. A portion of the proposed site comprises the former Hone Oil Company (Hone Oil) facility located at 2004 Wall Ave. The Hone Oil Company distributed petroleum products including gasoline and diesel fuel from six aboveground storage tanks (ASTs) in the northwest area of the property. Physical inspections and a review of analytical data from soil and groundwater sampling performed in this area have revealed a large area of petroleum contaminated soil and free product floating on top of groundwater in this portion of the site. The contamination is likely a result of leaks and/or spills from the operation of these ASTs. At this point the ASTs have been removed from the site; however, the concrete secondary containment walls and distribution piping is still intact.

The cleanup and closure of contamination at this site is currently regulated under the authority of the Utah Department of Environmental Quality (DEQ) Division of Water Quality (DWQ). At the request of the DWQ, a Corrective Action Plan (CAP) has been developed by RMEC Environmental, Inc. (RMEC) to address site remediation to include excavation of contaminated soils in the area of the ASTs. The true extent of contaminated soil is unknown, however, based on results of sampling in the area, it is estimated that up to 2,800 tons of contaminated soil may need to be removed.

To characterize the soil for disposal, a composite sample of the most heavily contaminated soils was collected from inside the footprint of the secondary containment. The sample was submitted to American West Analytical Laboratories for analysis. Results of the analysis indicate the presence of diesel fuel, gasoline, and associated compounds including benzene, toluene, ethylbenzene, xylenes, and naphthalene (BTEXN). The results of the waste characterization sample have been submitted to E.T. Technologies for disposal at their Soil Regeneration Site (SRS) in Salt Lake City.

## SCOPE OF WORK

The DFCM is asking contractors for bids to excavate, transport and dispose of contaminated soils associated with the releases from the Hone Oil ASTs. In addition, the contractor bids will need to include costs for free product removal and backfilling/compaction of the excavated areas after removal of the contaminated soils is complete. The DFCM has contracted RMEC to coordinate and oversee this work and perform confirmation sampling after the contaminated soil has been removed from the site. Backfill and site restoration work will have to occur after RMEC has received the results from the confirmation sampling, which should take approximately two to three business days. All work will be performed in accordance with applicable federal, state, and local requirements; including but not limited to the Utah Occupational Safety and Health (UOSH), Utah Department Environmental Quality (UDEQ), Occupational Safety and Health Administration (OSHA), Environmental Protection Agency (EPA), Weber County, and City of Ogden.

Contractors bidding on this project shall provide a bid to furnish all labor, tools, materials and equipment necessary to perform the following work:

PROJECT DESCRIPTION  
PAGE NO. 2

- a. Prior to beginning site work, the Contractor shall develop a site-specific Health and Safety Plan in accordance with 29 CFR 1910.120 (b)(4).
- b. Excavation of contaminated soils in the area of the former Hone Oil ASTs. The contractor will be required to segregate uncontaminated soils from contaminated soils. RMEC will direct excavation efforts and identify contaminated soils that will require off-site disposal.
- c. Removal and disposal of free petroleum product from surface of groundwater encountered during excavation of contaminated soils. For the purposes of the RFP, assume that up to 1,000 gallons of petroleum product may need to be skimmed from the excavation. Disposal of petroleum product and contaminated groundwater must be in accordance with State and EPA rules.
- d. Excavation of contaminated soils will require the removal of the concrete secondary containment structure, remaining product dispensing systems, approximately 100 feet of underground distribution piping and overlaying concrete pavement.
- e. Contractor shall transport and dispose of all contaminated soils at an appropriate disposal facility, such as E.T. Technologies Soils Regeneration Site (SRS) in Salt Lake City, Utah. The disposal facility must be permitted to accept the contaminated soils and the selection of disposal facilities are subject to approval by the DFCM. Contractor should provide unit rates per ton for removal, transport and disposal of contaminated soils at an appropriate facility, assuming that up to 2,800 tons of contaminated soils may require disposal.
- f. Upon completing the excavation of contaminated soils, RMEC will collect confirmation samples. The samples will be submitted to a State of Utah certified lab for analysis and the restoration of the site (including backfilling) cannot begin until the results from the confirmation samples have been received from the lab. At this time, the property is protected by a chain link fence. In addition to controlling access to the property, the contractor will be required to protect excavations with temporary safety fencing at the end of each shift and during the period while confirmation samples are being analyzed.
- g. Upon receiving acceptable confirmation samples back from the lab, the contractor shall restore the site to its original condition. Site restoration will primarily consist of backfilling, compacting and grading excavated and other areas that are disturbed during the contractors work. All backfill shall be a 3-inch minus engineered fill compacted to 95% compaction.
- h. Contractor will be responsible for contacting Blue Stakes and coordinating utility line locates prior to conducting excavations. Contractors will also be responsible for protecting utilities potentially impacted by the work. Contractor will be liable for the repair and replacement of any utilities or properties damaged as a result of negligence during this work.
- i. All contractor personnel working on the site shall have current OSHA HAZWOPER training in accordance with requirements of 29 CFR 1910.120.

**INSTRUCTIONS AND SUBCONTRACTORS LIST FORM**

The three low bidders, as well as all other bidders that desire to be considered, are required by law to submit to DFCM within 24 hours of bid opening a list of **ALL** first-tier subcontractors, including the subcontractor's name, bid amount and other information required by Building Board Rule and as stated in these Contract Documents, based on the following:

**DOLLAR AMOUNTS FOR LISTING**

**PROJECTS UNDER \$500,000: ALL FIRST-TIER SUBS \$20,000 OR OVER MUST BE LISTED**  
**PROJECTS \$500,000 OR MORE: ALL FIRST-TIER SUBS \$35,000 OR OVER MUST BE LISTED**

- Any additional subcontractors identified in the bid documents shall also be listed.
- The DFCM Director may not consider any bid submitted by a bidder if the bidder fails to submit a subcontractor list meeting the requirements of State law.
- List subcontractors for base bid as well as the impact on the list that the selection of any alternate may have.
- Bidder may not list more than one subcontractor to perform the same work.
- If there are no subcontractors for the job that are required to be reported by State law (either because there are no subcontractors that will be used on the project or because there are no first-tier subcontractors over the dollar amounts referred to above), then you do not need to submit a sublist. If you do not submit a sublist, it will be deemed to be a representation by you that there are no subcontractors on the job that are required to be reported under State law. At any time, DFCM reserves the right to inquire, for security purposes, as to the identification of the subcontractors at any tier that will be on the worksite.

**LICENSURE:**

The subcontractor's name, the type of work, the subcontractor's bid amount, and the subcontractor's license number as issued by DOPL, if such license is required under Utah Law, shall be listed. Bidder shall certify that all subcontractors, required to be licensed, are licensed as required by State law. A subcontractor includes a trade contractor or specialty contractor and does not include suppliers who provide only materials, equipment, or supplies to a contractor or subcontractor.

**'SPECIAL EXCEPTION':**

A bidder may list 'Special Exception' in place of a subcontractor when the bidder intends to obtain a subcontractor to perform the work at a later date because the bidder was unable to obtain a qualified or reasonable bid under the provisions of U.C.A. Section 63A-5-208(4). The bidder shall insert the term 'Special Exception' for that category of work, and shall provide documentation with the subcontractor list describing the bidder's efforts to obtain a bid of a qualified subcontractor at a reasonable cost and why the bidder was unable to obtain a qualified subcontractor bid. The Director must find that the bidder complied in good faith with State law requirements for any 'Special Exception' designation, in order for the bid to be considered. If awarded the contract, the Director shall supervise the bidder's efforts to obtain a qualified subcontractor bid. The amount of the awarded contract may not be adjusted to reflect the actual amount of the subcontractor's bid. Any listing of 'Special Exception' on the sublist form shall also include amount allocated for that work.

**GROUNDS FOR DISQUALIFICATION:**

The Director may not consider any bid submitted by a bidder if the bidder fails to submit a subcontractor list meeting the requirements of State law. Director may withhold awarding the contract to a particular bidder if one or more of the proposed subcontractors are considered by the Director to be unqualified to do the Work or for

such other reason in the best interest of the State of Utah. Notwithstanding any other provision in these instructions, if there is a good faith error on the sublist form, at the sole discretion of the Director, the Director may provide notice to the contractor and the contractor shall have 24 hours to submit the correction to the Director. If such correction is submitted timely, then the sublist requirements shall be considered met.

**CHANGES OF SUBCONTRACTORS SPECIFICALLY IDENTIFIED ON SUBLIST FORM:**

Subsequent to twenty-four hours after the bid opening, the contractor may change its listed subcontractors only after receiving written permission from the Director based on complying with all of the following criteria.

- (1) The contractor has established in writing that the change is in the best interest of the State and that the contractor establishes an appropriate reason for the change, which may include, but not is not limited to, the following reasons: the original subcontractor has failed to perform, or is not qualified or capable of performing, and/or the subcontractor has requested in writing to be released.
- (2) The circumstances related to the request for the change do not indicate any bad faith in the original listing of the subcontractors.
- (3) Any requirement set forth by the Director to ensure that the process used to select a new subcontractor does not give rise to bid shopping.
- (4) Any increase in the cost of the subject subcontractor work is borne by the contractor.
- (5) Any decrease in the cost of the subject subcontractor work shall result in a deductive change order being issued for the contract for such decreased amount.
- (6) The Director will give substantial weight to whether the subcontractor has consented in writing to being removed unless the Contractor establishes that the subcontractor is not qualified for the work.

**EXAMPLE:**

Example of a list where there are only four subcontractors:

The DFCM may apply such withheld amounts for the payment of such claims in DFCM's discretion.
