SELECTION COMMITTEE JUSTIFICATION STATEMENT

The selection committee would like to express its appreciation to all of the teams that proposed for services on the above referenced project. The selection committee selected the AJC Architects/360 Architecture team for the programming and possibly the design of the Aggie Life & Wellness Center at the Utah State University in Logan, Utah. This team's selection is based on the following detailed conclusions in accordance with the selection criteria:

DFCM Past Performance Rating: This score is based on the average of ratings for previous projects as explained in the RFP.

Strength of Team: This team's energy was palpable and very contagious with the selection committee. The AJC team, specifically Jill, has personal background in recreation in addition to programming experience with USU. 360 Architecture has recent programming/design, benchmarking, and trending experience with similar projects on a national level and an enthusiasm that invited participation. The AJC team is familiar working on the USU campus. They prepared well to understand the feasibility study and master planning that had been developed with other firms on campus.

Project Management Approach: The AJC/360 team gave a detailed breakdown of their schedule plan for meetings. This team demonstrated in their presentation a unique ability to interact and communicate with the students who will be the ultimate users. Once again their enthusiasm was unique.

Schedule: With another project on campus the AJC team will be able to enhance and speed communication to meet the ambitious schedule.
